

## Volusia County Substance Abuse Task Force

### Confiscated Pill data from Lieutenant Dietrich Data is from the last 10 years.

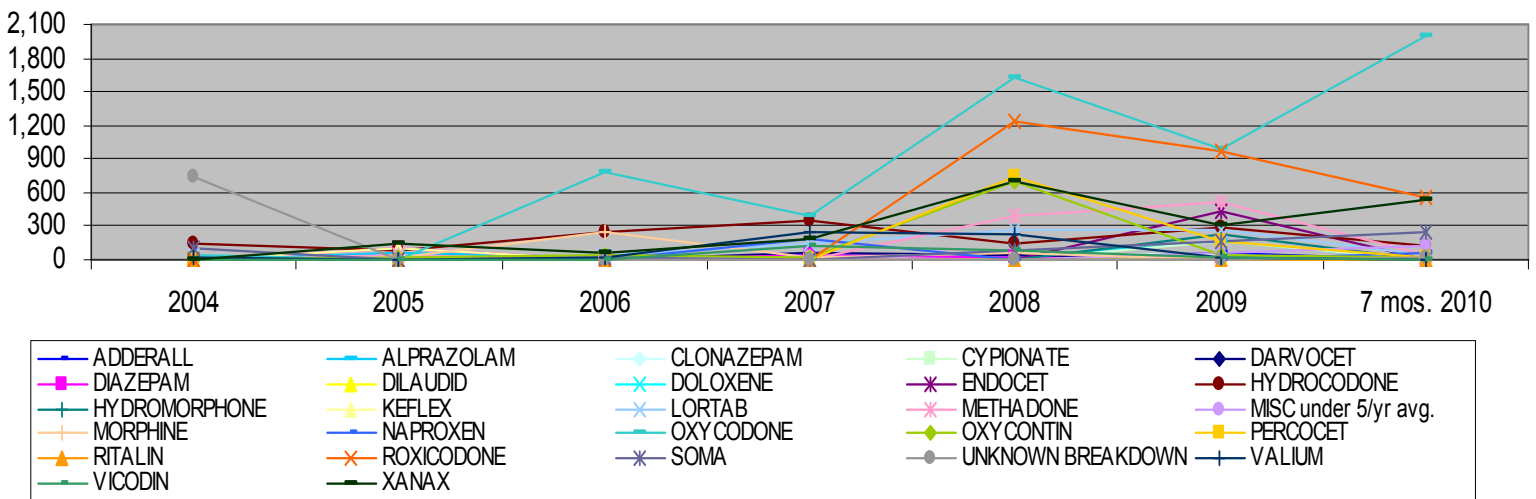

Medications are categorized separately by name of pill in reports at the department and summarized here for your convenience.

This chart is the total of pills seized per year with the projected amount of pills to be seized by 12/31/10 based on an average over the last 10 years of a 41% increase from the first six months to the second six months of pill seizures.

#### Total Pills Seized Per Year 2000 through Six Months of 2010 & Projected Year End Total

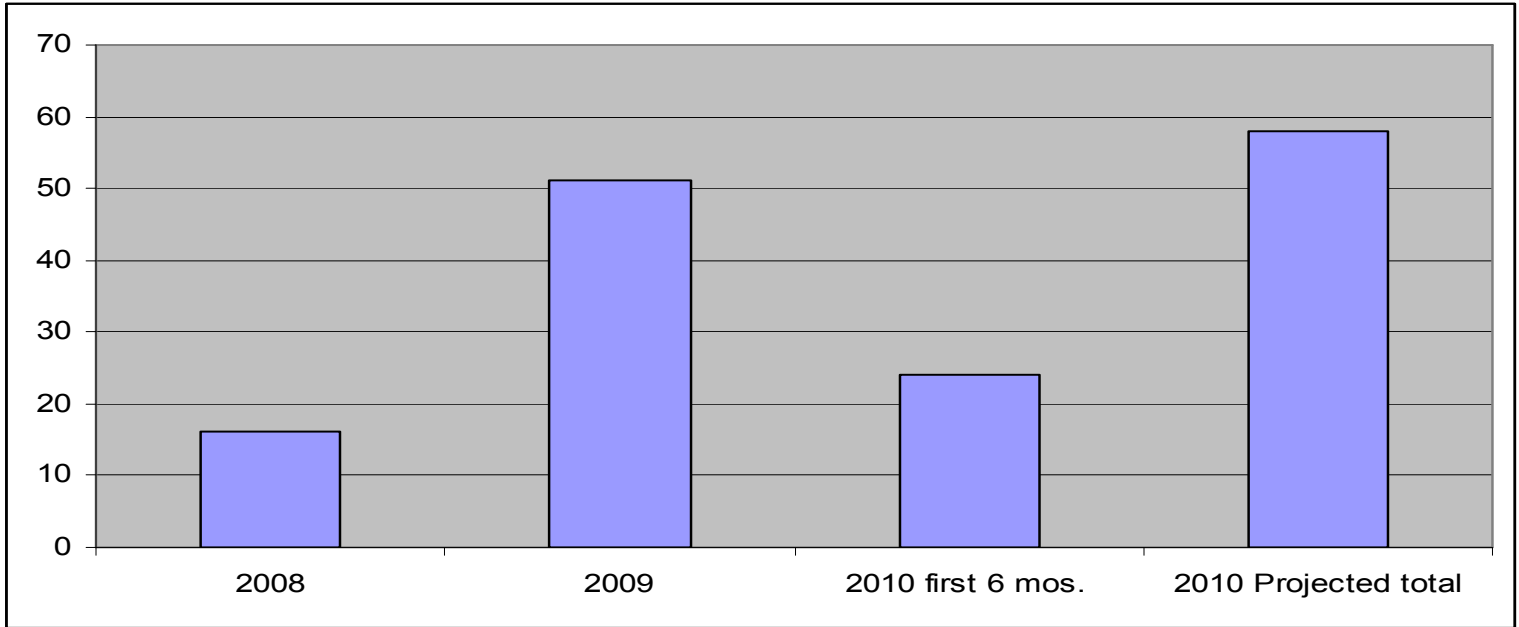

This graph shows the individual pills seized and the amounts of each through the first seven months of this year. The top five seized this year thus far are Oxycodone, Roxycodone, Xanax, Soma, and Hydrocodone. The graph starts in 2004 because of a blip in 2003 with an extremely large seizure of Xanax.
